In the near future, a new biological weapon was developed. It turned the world population into mindless zombies. Few days before the apocalypse, you are the last survivor. You must save yourself and the world. Two mechs are armed with homing missiles and machine guns. One of them is moving on a random path. A humanoid enemy is chasing you. On ground, a biomechanical mutant enemy appears. The biomechanical mutants are using fireballs. A large robot is guarding the level. The mission objective: survive. The player can choose any path. Pick up any weapon and start firing on all enemies. Select from two power-ups. If in close combat, the power-up will allow you to kill the enemies at a small risk. If you want to escape, stop killing and run to the exit. Keep an eye on the radar. There are 19 levels with different conditions. Finish the level within the set time. You may find keys or boxes in the levels. Some levels are mission selectable. Upon collecting all the keys, you will be able to skip the level. The game has a total of 16 unlockable skins. The weapons include firearms and melee weapons. Only the firearms are reloadable. The melee weapons have unlimited ammo. Upon death, the game stops with the most recent bullet, if any. It's easy to walk into a past life, and have an unclear sense of the consequences. As a child, I could walk into a past life, and live in a familiar environment, without knowing any of the consequences. But I don't think I'm the only one who does that, and after hearing what happened at the Temple, I'm convinced that I'm not the only one in a position to change the future. Review: Detoxifying Treats & More Do you want to reduce some products from your kitchen? Can you cope with your morning workload without icing-cream? We have a very welcomingly presented solution for you as today we review the Baking Bustle the wood stove electric rice cooker with extended baking capacity, which I am sure our readers will appreciate! The maker of the Baking Bustle has the same name as its predecessor, the Cooking Bustle, with one more star above the product's name, Baking Bustle. In this review we bring you some information regarding the release date, manufacturing quality, quality and durability, cooking and baking capability of this lovely rice cooker. The Baking Bustle Top So this is what we know so far of this lovely product: The Baking Bustle is a wood stove rice cooker that comes in a nice black elegant looking wooden box. The packaging is very attractive and doesn't look like a cheap product. This also means you can clean it in a fast and easy way. If you take out the cooking rice bowl, you will see that it is also a multifunctional kitchen product suitable for serving warm drinks on its three extra wide seats in a container, have a picture! When it's dirty, you will see that you can have a better grip on it as the wooden stick is a softer material than the black base. The size of the cooker container is 82cm long, 29cm wide and 1m height. I think this is the normal size for the cooking bustle set, but I am not 100% sure. The cooker bowl has an ultra capacity of 9.8 qt and the rice bowl is a capacity of 2.95 qt, so you need to make sure you measure it accordingly. The bowl can hold almost 3 cup of rice. A wide variety of spices and other useful spices can be added at the rice. Another large feature of the cooking bustle is the fact that it heats up fast, what makes it even more useful for cooking rice. Important: check the washing instructions of rice before you use the cooker, some less wash all rice in place or only wash and dry. See the washing instructions below. The separate electric box has two power socket connections and thus electrical access. Operation of The Baking Bustle The Baking Bustle is a tablet based rice cooker. You will need to charge its power box by plugging it in to a socket, which is easy to do

The protective value of interventional radiology procedures in pancreatic diseases. The aim of our study was to evaluate the need for intervention in patients with pancreatic diseases by means of endoscopic retrograde cholangiopancreatography (ERCP) and to compare the results obtained with those in patients without intervention. The study involved 80 patients with pancreatic diseases who were performed ERCP and fine needle aspiration (FNA), while in 10 cases ERCP-FNA was repeated after therapeutic endoscopic sphincterotomy (EST). In cases with successful ERCP-FNA, the changes were compared in a detailed analysis. ERCP-FNA findings were reliable in 20 cases (25%); in 20 cases (25%), at least two more punctures were necessary (15 cases were diagnosed with pancreatic cancer). In 5 cases, the amount of fluid was small and did not require removal; in the remaining 25 cases, fluid removal was necessary. EST was performed in 76.2% of patients, intra- (n=39) or post- (n=47) pancreatic duct (PD) cannulation was successful in all (100%); during post-PD cannulation, bile duct stricture was treated in 6 cases.
