In the future, survival has long become a thing of the past. The only way to overcome the ever-increasing odds against the human race are to develop our technology into the final frontier of survival. We call this technology, the Sublime Death and the hope is that it will lead to a better world. Manni's best friend is sick and only he can help. However this friend lives far away, in another forest. Every day you have to set out in Manni's little buggy and deliver your friend the berries he collects along the way. But every day is not the same, as you can't just drive over any path... well, you can but when you reach your destination you'll be driven away! With several hundred thousand downloads worldwide and a score of 10 from the critics for the Browser Edition, The Game has come a long way since its establishment in 2017. The mobile platform has proven to be a suitable platform for a game like this, as once again the users' experience will be improved even more by this new edition. The new features are explained in the attached video! Is there anyone here who would like to support this initiative by buying the game through Steam, or by being active in our Community. When all free codes have been redeemed we are ready to release it on the iOS App Store and Google Play! Thanks for all your support. Happy Holidays and all the best for the New Year! (PS: All paid purchases will be refunded)It seems like every superhero movie in the past five years has gone from promising heartland heartthrob to mega-star lothario in one swoop. I'm not sure what their names are, but I know this about Tony Stark: He can explode. I believe it was a line from The Avengers. And honestly, it was long overdue. With The Avengers bringing in close to a billion dollars, it makes sense for the world's most powerful man to be on the big screen looking like a badass.K-Pop star Cho Yong Pil, who released his new single, "Me and I," in Korea on the 1st, is coming to
